

# Daniel Steele - Full Stack Developer

| [Dsteele1906@gmail.com](mailto:Dsteele1906@gmail.com) | <https://www.linkedin.com/in/daniel-steele1/> | <https://github.com/DanielSteele1> | <https://danielsteele.dev> |

## EDUCATION

### Plymouth University

*Bachelor of Science in Computer Science*

Plymouth, UK

*Sept. 2021 – Jun. 2024*

### South Devon College

*BTEC Extended Diploma in Computer Science*

Paignton, UK

*Sept. 2019 – July 2021*

### South Devon College

*BTEC Diploma in Computer Science*

Paignton, UK

*Sept. 2018 – July 2019*

## EXPERIENCE

### WordPress Developer - Short Work Experience

*Falcon Digital*

Feb. 2022 – April 2022

*Newton Abbot, UK*

- Developed WordPress websites for local businesses across the south west.

## PROJECTS

### SkyCompass | *MongoDB, ExpressJS, React, NodeJS, JavaScript, Figma*

June 2020 – Present

- Developed a full-stack web application to track weather patterns using OpenWeatherMap and Open-Meteo's free API's.
- Features include a multiple layers of data such as global precipitation, temperature levels and wind patterns.
- Automatically updates once every three hours, with a core forecast feature to update every 15 minutes.
- Users can focus in on any location on the planet to receive up-to-date weather data.

### Developer Portfolio | *MongoDB, ExpressJS, React, NodeJS, JavaScript, MaterialUI, Git, Figma*

May 2024

- Developed a front-end web application to showcase my work online.
- Personal website, available at <https://danielsteele.dev>.
- Fully responsive with animation, hosted using GitHub pages.
- Features all projects mentioned, plus a select few extra.

### Earth Sim | *C++, OpenGL, GLSL, ASSIMP, GLFW, GLAD, GLM*

November 2023 - January 2024

- Developed by me for my game development class.
- The goal was to create a simulation of the solar system.
- It consists of models of the earth and moon rotating around each other in a 3D environment.
- Full camera controls are also implemented, along with a satellite for aesthetics.

### TravelTracker.io | *MongoDB, ExpressJS, React, NodeJS, JavaScript, Git, Figma, MaterialUI*

Ongoing Project

- Developed a full stack web application for users to track their holiday memories.
- Users interact with a 3D map interface to track holiday destinations.
- Features include ability to add photos and descriptions of each trip, a photo book, holiday suggestions and the ability to share data with family and friends.
- Accounts fully implemented, with data being stored using MongoDB and encrypted with Bcrypt hashing.

### Knights Adventure - Dungeon Crawler CMD game | *C++*

September 2023 - December 2023

- Developed by me for my game development class.
- Knights adventure is a command line game I created, featuring rooms, treasures and secrets. There is only one real route to the end, but a plethora of ways to lose health and die.
- This project was built to practice my core C++ skills.
- It also features a shop, and a gold collection system.

## TECHNICAL SKILLS

**Languages:** HTML/CSS, JavaScript, C/C++, OpenGL, SQL, MongoDB

**Frameworks:** React, NodeJS, ExpressJS, WordPress

**Developer Tools:** Git, VS Code, Visual Studio, Figma

**Libraries:** MaterialUI, LeafletJS, Mapbox API, Bcrypt encryption
